# NTC THERMISTOR TEMPERATURE SENSOR

DONGGUAN TIANRUI ELECTRONIC CO.,LTD

Office environment

Effective management

Well-trained staff

Strict QC

Advanced equipment

## COMPANY INTRODUCTION

TianRui Electronics Industrial is a professional manufacturer integrated by developing, producing and sales of NTC thermistor and temperature sensor.

It is located in Botou Industria zone,Chashan,Town,Dongguan, Guangdong,China(Mainland)

TianRui was founded in 2001, covering about 1800 square meters. After over ten years of growth, TianRui has its own sizable factory and complete production testing equipments, and passed ISO9001-2008 quality management system certification. The products comply with EU ROHS environmental protection directive.

As customized product, NTC sensor is widely used in temperature measurement for induction cooker, rice cooker, microwave oven, water machine, electric kettle, heater, air conditioner, refrigerator, water dispenser, disinfection cabinet, washing machine, coffee maker and so on household appliances. Besides, the sensors are applicable to automobile, Internet of things, battery, intelligent closetool, electric blanket, power overheated protection, lamps and lanterns, power tools, medical temperature measurement, industrial temperature measurement, garden temperature control and breeding industry etc.

TIANRUI adheres to "development achieved by management, profits gotten by quality", advanced enterprise culture and process management, to make continuously improvement.

In strict accordance with controlling production process, TianRui has twelve cellular production lines, providing senior application engineer and powerful test team, to ensure terminal product defective rate within 5PPM. We make customers request as the starting point, accurately grasp the consumer demand to supply cost-effective NTC products, by continuously innovation and keeping technique and production process optimization, and constantly improving quality.

Based on superior products and services, TIANRUI has gained recognition of many global enterprises, including Electrolux German EGO, Videocon and Panasonic etc.

Meanwhile, we provide reliable NTC sensor for domestic well-known appliance brands such as Midea, Galanz, Changhong and become superior supplier of many famous enterprises, such as Xinbao, Topband, Weili, Vanward and Kinglong motor.

### ● Business Type

Manufacturer  
Trading Company

### ● Primary Competitive Advantages

High quality  
Competitive price  
Excellent service  
Reliability  
Reputation  
High customer satisfaction

### ● OEM Services Provided

Yes

### ● Safety Approval

RoHS

### ● Quality system

ISO9001

### ● NTC factory

Employees:80-100  
Engineering:3  
QA/QC:7

### ● Temperature sensor factory

Employees:80-100  
Engineering:4  
QA/QC:8

### ● Our main customers:

## Thermistor info

Thermistor is a semiconductor ceramic made from Mn, Cu, Co, Ni and so on oxide of the transition metals, which is sintered at the temperature of 1200°C to 1400°C . It is formed combined with our advanced semiconductor processing technics, with features of various specifications ,high precision, excellent stability and good interchangeable. The basic physical characteristics are resistance value, B value, thermal dissipation coefficient, time constant.

## Terminology

## ● Zero-Power Resistance

The zero-power resistance is the dc resistance value of a thermistor measured at a specified temperature with power dissipated by the thermistor low enough that any farther decrease in power will result in not more than 0.1 % change in resistance.

## ● Resistance value: R (Ω)

The mathematical expression,which relates the resistance and the absolute temperature of a thermistor,is as follows:

$$R_2=R_1 \times \text{EXP}[B \times (1/T_2-T_1)]$$

Where: R<sub>1</sub> and R<sub>2</sub> are the value of resistance at the absolute temperature T<sub>1</sub> and T<sub>2</sub>

## ● Beta (°K), (expressed in ° Kelvin)

The material constant of a thermistor . Unless otherwise specified . Beta is derived from thermistor resistance measurements obtained at 25° and 50°C.

$$B = \frac{\text{Ln}R_1 - \text{Ln}R_2}{\frac{1}{T_1} - \frac{1}{T_2}}$$

● Temperature Coefficient Of Resistance(alpha α<sub>r</sub>)

Zero-power coefficient of resistance is the ratio at the specified temperature (T) of the rate of change of zero-power resistance with temperature to the zero-power resistance of the thermistor

$$\alpha_r = \frac{1}{R_r} \cdot \left( \frac{dR_r}{dT} \right)$$

## ● Dissipation Coefficient: δ (mW/°C)

Dissipation coefficient is obtained by dividing power consumption of thermistor by the change of the environment temperature

$$\delta = W / (T - T_0) = I^2 R / (T - T_0)$$

Notes: W: Consumption power of thermistor (mW)

T: Temperature at the thermal balance

T<sub>0</sub>: Ambient environment temperature

I: Current of thermistor at the temperature of T

R: Resistance of thermistor at the temperature of T (Ω)

## ● Thermal Time Constant

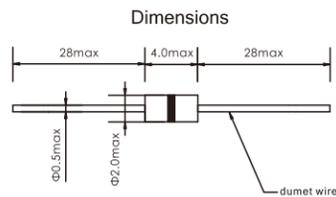

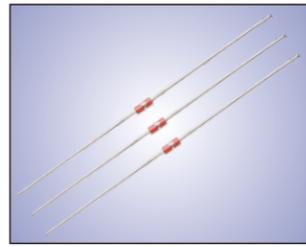

The thermal time constant is the time required for a thermistor to change 63.2% of the total difference between its initial and final body temperature when subjected to a step function change in temperature under zero-power conditions.

## ● Maximum Power Rating

The maximum power rating of a thermistor is the maximum power , which a thermistor will dissipate for an extended period of time with acceptable stability of its characteristics.

## ● Maximum Operating Temperature

The maximum operating temperature is the maximum body temperature at which the thermistor will operate for an extended period of time with acceptable stability of its characteristics.This temperature can be the result of internal or external heating,or both,and should not exceed the maximum value specified.

## MF58 Thermistors

### Glass shell diode

#### Features:

Glass-coated, heat resistance, small size, high stability and reliability  
Suitable for auto insert machine. Economical

#### Applications:

Electric rice cooker , electric oven , disinfector, water dispenser, dish washer, etc.

Chemical equipment and food processing equipment

Mobile battery and charger

#### Part number guide:

TR MF58 - 502 - F - 3950 F

① ② ③ ④ ⑤ ⑥

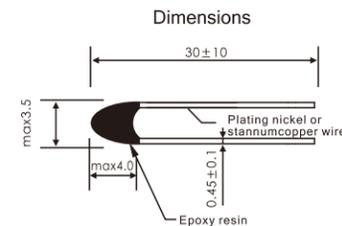

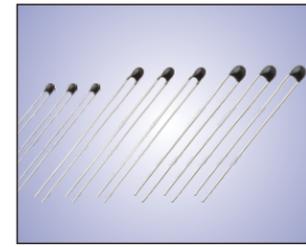

#### Where:

- ① NTC Thermistor
- ② Glass-coated;
- ③ Rated zero-power resistance at 25°C.  
For example: 502 means  $R_{25^\circ\text{C}} = 5\text{K}\Omega$
- ④ Resistance tolerance: F ( $\pm 1\%$ ); G ( $\pm 2\%$ ); H ( $\pm 3\%$ ); J ( $\pm 5\%$ ); K ( $\pm 10\%$ )
- ⑤ B Value ( $B_{25/50^\circ\text{C}}$ ): 3950K
- ⑥ B Value tolerance: F ( $\pm 1\%$ ), G ( $\pm 2\%$ ); H ( $\pm 3\%$ )

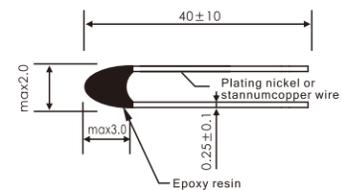

#### Typical Products Specifications:

Part number	$R_{25^\circ\text{C}}$ (K $\Omega$ )	$B_{25/50^\circ\text{C}}$ (K)	Dissipation Coefficient (mW/°C)	Time Constant (S)	Operating Temperature Range (°C)
MF58-202-3470□	2	3470	In still air 2.5max	In still air 17max	-40~+150°C
MF58-502-3500□	5	3500			-40~+150°C
MF58-103-3435□	10	3435			-40~+150°C
MF58-103-3600□	10	3600			-40~+150°C
MF58-473-3950□	47	3950			-40~+250°C
MF58-503-3950□	50	3950			-40~+250°C
MF58-104-3990□	100	3990			-40~+300°C
MF58-154-4100□	150	4100			-40~+300°C
MF58-204-4300□	200	4300			-40~+300°C
MF58-105-4400□	1000	4400			-40~+300°C

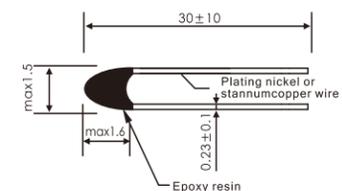

- "□" indicates the resistance tolerance: F ( $\pm 1\%$ ); G ( $\pm 2\%$ ); H ( $\pm 3\%$ ); J ( $\pm 5\%$ ); K ( $\pm 10\%$ )
- B Value :determined by rated zero-power resistance at 25°C and 50°C, tolerance:  $\pm 1\%$ .
- Special specifications are customized by your request.

MFA3-2

MF5A2

MF5A3

## MF5A2,3 Thermistor

### Epoxy resin coated

#### Features:

Epoxy coated, small size  
Quick response, high precision  
Good stability

#### Applications:

Temperature sensor  
Electronic perpetual calendar and temperature meter  
Temperature compensation

#### Part number guide:

TR MF5A 2 - 502 G 3950 G

- "□" indicates the resistance tolerance: F ( $\pm 1\%$ ); G ( $\pm 2\%$ ); H ( $\pm 3\%$ ); J ( $\pm 5\%$ ); K ( $\pm 10\%$ )
- B Value :determined by rated zero-power resistance at 25°C and 50°C, tolerance:  $\pm 1\%$ .
- Special specifications are customized by your request.

## MF5A4 Thermistor

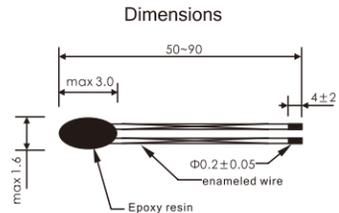

**Enameled wire coated**

### Features:

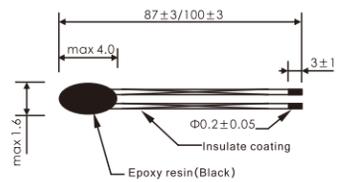

- Epoxy coated, small size, high precision
- High reliability, quick response
- Polyester enameled wire for good heat resistance and high insulation performance

### Applications:

- Electronic clinical thermometer and microwave therapy instrument
- Temperature meter and electronic dishwasher

MF5A4-1

MF5A4-2

### Material:

Package	Color	Wire
Epoxy resin	Black	Enameled wire

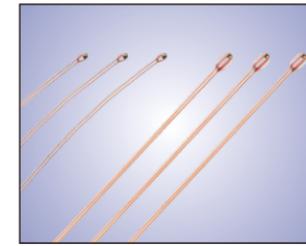

### Part number guide:

MF5A	4	503	F	3950
NTC temperature measure thermistor	Suitable for digital thermometer	Resistance 50X10 <sup>3</sup> =50KΩ	Resistance tolerance ± 1%	B-value (25/50) 3950K

### Resistance rated table:

Rating zero power resistance R <sub>37</sub> (1-32)±0.09%(37.00℃)							
Rate 1	29.111KΩ	Rate 9	29.535KΩ	Rate17	29.964KΩ	Rate25	30.401KΩ
Rate 2	29.164KΩ	Rate10	29.588KΩ	Rate18	30.019KΩ	Rate26	30.456KΩ
Rate 3	29.216KΩ	Rate11	29.641KΩ	Rate19	30.073KΩ	Rate27	30.511KΩ
Rate 4	29.269KΩ	Rate12	29.695KΩ	Rate20	30.128KΩ	Rate28	30.566KΩ
Rate 5	29.322KΩ	Rate13	29.749KΩ	Rate21	30.182KΩ	Rate29	30.622KΩ
Rate 6	29.375KΩ	Rate14	29.802KΩ	Rate22	30.237KΩ	Rate30	30.677KΩ
Rate 7	29.428KΩ	Rate15	29.856KΩ	Rate23	30.291KΩ	Rate31	30.731KΩ
Rate 8	29.481KΩ	Rate16	29.910KΩ	Rate24	30.346KΩ	Rate32	30.785KΩ

When the test temperature precision over ±0.01℃, the resistance will drift slightly. Temperature drifts beyond the precision of the amplitude increases.

## MF5B1,2 Thermistor

**Glass coated**

### Features:

- Glass-coated, heat resistance, small size
- High stability and reliability
- Suitable for auto insert machine
- Quick temperature response

### Applications:

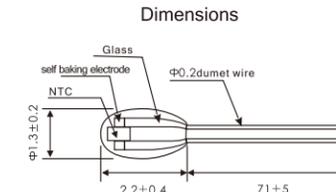

- Temperature Sensors, Digital clinical thermometer
- Temperature measurement and control for chemical equipment
- Mobile battery and charger

### Part number guide:

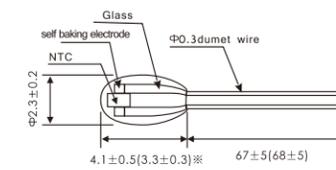

TR MF58 1,2 - 502 F 3950 F  
① ② ③ ④ ⑤ ⑥ ⑦

### Where:

- NTC Thermistor
- Glass-coated
- Shape: pearl-shape
- Rated zero-power resistance at 25℃.  
For example: 502 means R<sub>25℃</sub> = 5KΩ
- Resistance tolerance: F (±1%), G (±2%); H (±3%); J (±5%); K (±10%)
- B Value (B<sub>25/50℃</sub>): 3950K
- B value tolerance: F (±1%); G (±2%); H (±3%)

MF5B1

- Special specifications are customized by your request.

## MF11 MF12 Thermistors

### Features:

MF11: High precision

MF12: Broad range of resistance, the maximum rated resistance can reach 5MΩ good stability.

### Application:

Temperature measurement, temperature compensation in measuring equipments and transistor circuit.

### Part number guide:

TR MF11 502 - G 3950 F

① ② ③ ④ ⑤ ⑥

### Where:

- ① NTC Thermistor
- ② Compensation NTC
- ③ Rated zero-power resistance at 25°C.  
For example: 502 means  $R_{25°C} = 5K\Omega$
- ④ Resistance tolerance: G ( $\pm 2\%$ ); H ( $\pm 3\%$ ); (  $\pm 5\%$ ); K ( $\pm 10\%$ ); L ( $\pm 20\%$ )
- ⑤ B Value ( $B_{25/50°C}$ ): 3950K
- ⑥ B value tolerance; F ( $\pm 1\%$ ); G ( $\pm 2\%$ ); H ( $\pm 3\%$ )

### Typical Products Specifications:

 B value tolerance:  $\pm 5\%$   
 Measuring power  $\leq 0.1mW$  Rated Power: 0.5W  
 Operating temperature:  $-55\sim+125^\circ C$   
 Dissipation Coefficient  $r \geq 6mW/^\circ C$ ; Time constant  $\leq 30S$

## MF72 Power NTC Thermistor

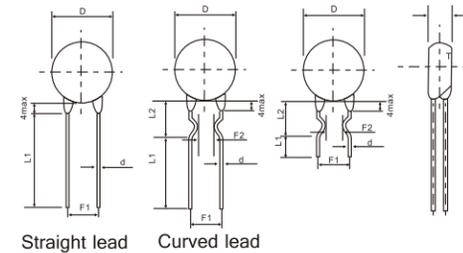

### Characteristics:

- ① Small size strong power and strong capability of surge current protection
- ② Fast response to surge current
- ③ Big material constant (B value), Small remain resistance
- ④ Longevity of service, High reliability
- ⑤ Integral series, extensive operating range

### Applications

- ① Cover:   
injection power - supply, switch power, ups power
- ② Electronic energy saving lamps, electronic ballast and all kinds of electric heater
- ③ All kinds of RT .display
- ④ Bulb and other lighting lamps

Remark: Unless the particular indication, the allowable tolerance of R<sub>25</sub> is  $\pm 20\%$ .

## SMD NTC Thermistor

### Features:

- Small size, fit for high density PCB
- Quick response, high precision
- Good solder ability
- Glass surface protect. High structural stability and reliability

### Applications:

- Equipment related to mobile communication TCXOs (temperature compensated type quartz oscillator), RF circuits (power amp circuits. Temperature monitoring circuits), LCD panel.
- Temperature compensated crystal oscillator, which is the key device for mobile phones.
- Temperature sensor for CPU
- IC and Semiconductor protecting
- Player Driver, telecom exchanger, etc.

### Part number guide:

TRSM D 0402 - 502 - G 3950 F  
 ① ② ③ ④ ⑤ ⑥

### Where:

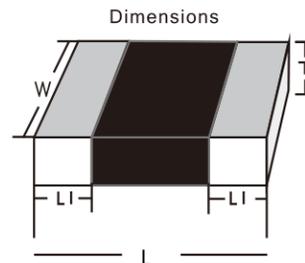

- ① Chip NTC Thermistor, SMD shape
- ② Type number
- ③ Resistance value at 25 °C ( $R_{25^{\circ}\text{C}}$ ) - Example: 503 means 50K  $\Omega$ .
- ④ Resistance tolerance: F( $\pm 1\%$ ); G( $\pm 2\%$ ); H( $\pm 3\%$ ); J( $\pm 5\%$ ); K( $\pm 10\%$ )
- ⑤ B Value ( $B_{25/50^{\circ}\text{C}}$ ): 3950K
- ⑥ B Value tolerance: F ( $\pm 1\%$ ), G ( $\pm 2\%$ ); H ( $\pm 3\%$ )

### Typical Products Specifications:

Part number	$R_{25^{\circ}\text{C}}$ (K $\Omega$ )	$B_{25/50}$ (K)
SMD □-101■-2700◇	0.1	2700
SMD □-221■-2900◇	0.22	2900
SMD □-331■-3000◇	0.33	3000
SMD □-471■-3100◇	0.47	3100
SMD □-681■-3150◇	0.68	3150

- indicates the resistance tolerance: F( $\pm 1\%$ ); G( $\pm 2\%$ ); H( $\pm 3\%$ ); J( $\pm 5\%$ ); K( $\pm 10\%$ )
- B Value: determined by rated zero-power resistance at 25°C and 50°C, tolerance:  $\pm 1\%$
- Special specifications are customized by your request.

### Size

SIZE	L	W	T	L1
1206	3.20 $\pm$ 0.20	1.60 $\pm$ 0.20	1.30max	0.20~0.80
0805	2.00 $\pm$ 0.20	1.25 $\pm$ 0.20	1.20max	0.20~0.50
0603	1.60 $\pm$ 0.15	0.80 $\pm$ 0.15	0.95max	0.20~0.50
0402	1.00 $\pm$ 0.10	0.50 $\pm$ 0.01	0.60max	0.15~0.30

## MF58-1 Thermistor

### SMD taping package

### Features:

- Glass coated, heat resistance, small size, high stability and reliability
- SMD taping package, suitable for auto insert machine

### Applications:

- Temperature compensation, digital clinical thermometer, temperature measurement
- Control for chemical equipment and induction cooker, water heater, sterilizing cabinet
- Mobile battery and charger

### Part number guide:

TR MF 58 - 1 3950 - 103 F  
 ① ② ③ ④ ⑤ ⑥ ⑦

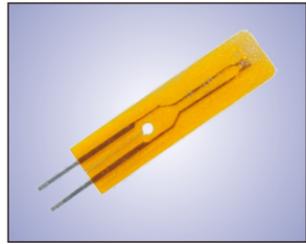

### Where:

- ① NTC Thermistor
- ② Compensation NTC
- ③ Glass-coated
- ④ SMD taping package
- ⑤ B Value ( $B_{25/50^{\circ}\text{C}}$ ): 3950K
- ⑥ Rated zero-power resistance at 25°C.  
For example: 103 means  $R_{25^{\circ}\text{C}} = 10\text{K}\Omega$
- ⑦ Resistance tolerance: F( $\pm 1\%$ ); G( $\pm 2\%$ ); H( $\pm 3\%$ ); J( $\pm 5\%$ ); K( $\pm 10\%$ )

### Typical Products Specifications:

Part number	$R_{25^{\circ}\text{C}}$ (K $\Omega$ )	$B_{25/50}$ (K)	Dissipation Coefficient (mW/ $^{\circ}\text{C}$ )	Time Constant (S)	Operating Temperature Range ( $^{\circ}\text{C}$ )

MF581-204-4260□	200	4260			-40~+300 $^{\circ}\text{C}$

- indicates the resistance tolerance: F ( $\pm 1\%$ ); G ( $\pm 2\%$ ); H ( $\pm 3\%$ ); J ( $\pm 5\%$ ); K ( $\pm 10\%$ )
- B Value :determined by rated zero-power resistance at 25°C and 50°C, tolerance:  $\pm 1\%$  .
- Special specifications are customized by your request.

# MF5E Thermistor

Insulating film coated

### Features:

- Insulating film coated,fast thermal speed, high sensitivity
- High stability and reliability
- High insulation performance
- High precision
- Safety
- Small size,light weight,rugged,easy to install automated

### Applications:

Temperature measurement , temperature compensation in measuring equipments and transistor circuit  
Widely used in computers , printers , switching power supply , cell phone batteries ,chargers,temperature control switches,household appliances and other small devices.
