DC Auto Parts Co.,Ltd.

Focused, Committed & Professional

》》 > ABOUT US

Located in Xingtai city Hebei province, DC Auto Parts was established in 2003, which specializes in the production of car filters. After years of development, it has been a professional manufacturer which integrating with research, develop, produce & sell.

To meet the demands, we set a branch company in Guangzhou, where is the biggest auto parts trade center in the South of China.

Working under the quality management system of TS16949, we have obtained high reputation among our customers by the high efficient filters and reasonable price. Our factory is equipped with many high technical and testing machines, like full-auto filter pleating production line, separated paper pleating production line, full-auto knife & rotary paper pleating machine, full-auto spin-on filter assembling production line and so on. Providing OEM & ODM service, DC Auto Parts has capability of producing more than 7 million pieces filters yearly.

Having established a wide marketing network, our products have been exported to European countries (France, Germany), Middle East (Egypt, Iran), South America, Southeast Asia countries (Singapore, South Korea, Thailand) etc.

Keeping focused, committed and professional, we are dedicated to provide first-class products and excellent service to you. We sincerely welcome clients all of the world to cooperate with us.

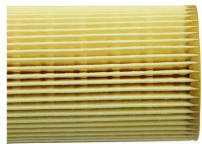

》》 > Workshop & Equipment

OIL FILTER

Using imported outstanding German paper, the effective removal of dirt, dust, carbon deposition, metal particles so as to protect engine. Regular origami inside sorting, to expand filtration area and prolong lifespan. Plastic parts and rubber parts are made of materials which is oil resistance, temperature resistance and high pressure resistance.

Outstanding imported German paper

* Ultrasonic welding techniques
* Mahler pad selected, excellent oil and temperature resistance performance

Using imported sealing pad, good sealability, heat resistance reaches 360 degrees

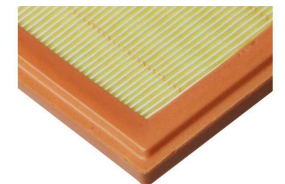

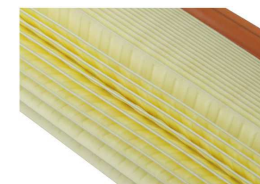

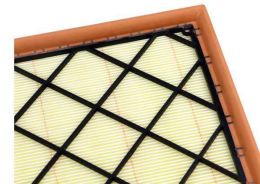

Heat welding techniques

AIR FILTER

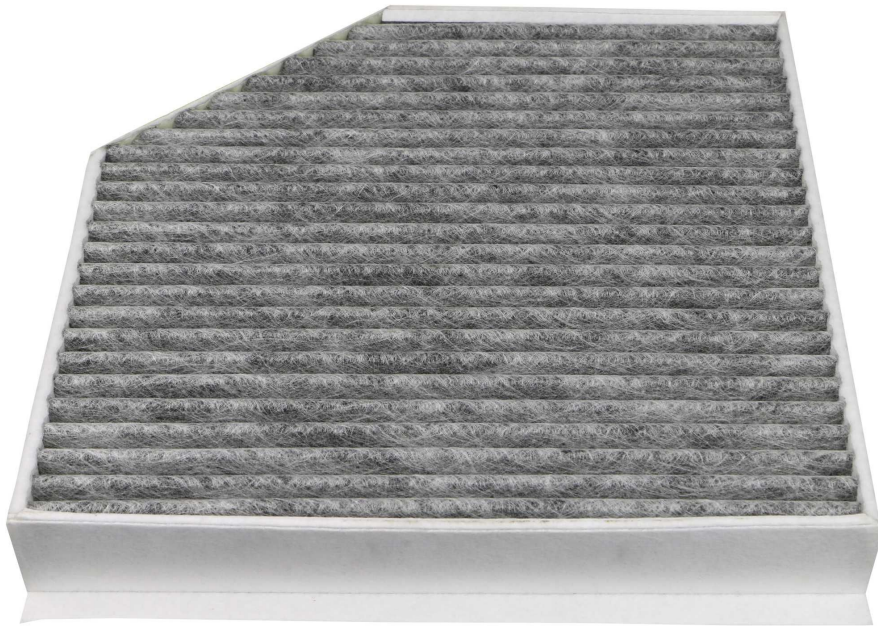

Our air filter can effectively filtrate dust, particles, pollen and other impurities to protect the engine and to prevent air flow meter from damaging, to ensure the safety of vehicles and people.

- ◆ PU type air filter, using high-end German GESSNER paper, which provides high wet stiffness, good waterproof performance, high-precision filtration can filtrate particles ($> 1-2\mu\text{m}$).
- ◆ Stable & high density origami, whose structure is so solid that is not easily to be deformed, with strength of large filtration area, high dust capacity and long lifespan.
- ◆ Using high-end PU, which are high density, anti-aging, smooth surface, flexibility, tensile and excellent recovery performance, to ensure low and high temperature resistance will not crack and deformation and 100% seal.

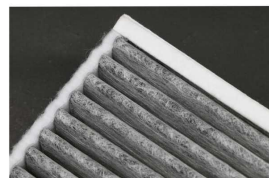

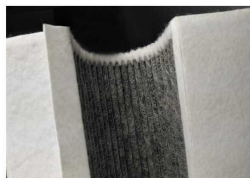

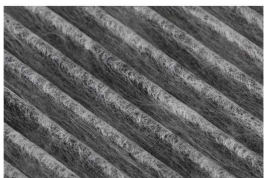

CABIN FILTER

Our cabin filter can effectively filtrate dust, pollen and PM2.5 in the air as well as other impurities from industrial pollution, so do the odor, second-hand smoke, dander, bacteria, etc.

- ◆ Standard folds to insure filtration area.
- ◆ Using outstanding active carbon, compared to common active carbon, the products are
- ◆ Characteristics of developed void space structures, large dust holding capacity and high adsorption capacity as well.
