COMPANY PROFILE 公司简介

生于专业的企业

铭捷公司成立于2005年，是一家专业从事海绵制品生产加工和销售的企业

研发能力突出

铭捷注重产品的研发与设计，具备成熟的PU发泡生产工艺，主要产品有慢回弹、高回弹等系列，涉及到健康睡眠床上用品、汽配汽车用品、家私办公用品等领域

生产设备先进

公司拥有1条电加热自动恒温PU发泡生产线，4条水加温PU发泡生产线，多台PU模塑灌注机和切割机，产品已通过SGS、TUV环保认证，保证了产品的质量和产量

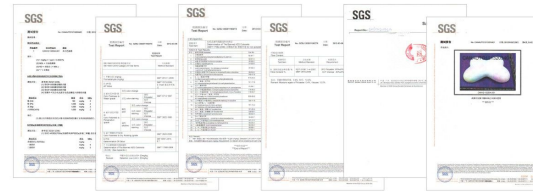

区位优势明显

广州铭捷家居用品有限公司，位于广州市花都区，距白云机场仅15分钟，离广清高速公路3分钟车程距广州黄埔港口40多公里，交通十分便捷。公司承接OEM、DOM订单，产品质量优越，深受国内外客户好评

Guangzhou Mingjie household products co.,ltd is located in Huadu District, Guangzhou City. It is about 15 minutes by car from Baiyun Airport, and 3 KM to Huadu Port. We are specialized in producing Memory Foam Products for ten years. By now, There are 5 automatic foaming production line in factory, So that orders can be finished with high efficiency. Meanwhile, The raw material for memory foam are imported from BASF Germany, which are high quality and eco-friendly. We take "People-oriented, Customer first, quality is life!" as our motto of management. After years of hard working, we have established good relationship with buyers from all over the world. If you are willing to find a honest, reliable and professional partner in memory foam products filed, Why not to contact us now?

权威产品认证 Products certification authority

产品材质 PRODUCT MATERIAL

太空记忆绵，又称慢回弹海绵。是由美国太空总署（NASA）的下属企业所研发。

九十年代初，瑞典FAGERDALA公司的科技转化为医用及民用的保健、时尚产品。这是一种能完全遵循身体轮廓的开放温感记忆粒子，这种开放的细胞组织结构允许空气在其中流动，并在任何你需要的地方给你完全没有反弹压力的支撑。

1998年，因该产品在商业上的巨大成功及为民众健康作出的贡献，慢回弹技术与GPS（全球定位系统）一道被任命进入美国宇航局名人堂。随着这一产品在西方发达国家的普及使用（平均每三个家庭就有一个在使用），这一技术也随之传播开来。

In the 80s of the 20 century, The American NASA invented slow bounce sponge in order to help astronauts release the great pressure during the launch time and the long journey in space. The typical eatures of the material are that it has stick elasticity and sense of heat and it could be sunken because of the heat and pressure but not sprang back. The two features make it as the very good material to release pressure.

Furthermore, the material has been extensively used in operational tables in medical treatment, cervical vertebra pressure release treatment, and athletic spots recovery and restoration It has been highly proved that all the appliances made of the material can effectively prevent cervical vertebra diseases of the aged people and those who have long worked at the office table.

波浪颈椎舒适记忆枕
Wave Shape Contour Memory Foam Pillow

回波形的造型设计更利于贴合脊椎，完全符合人体颈椎的自然曲线。并且由于顶部的回波设计在头部的自然重力下会形成自然向下牵引力，达到保健的作用。使用波浪记忆枕，将记忆枕高位放置于颈椎贴合，头部自然向后仰即可，记忆枕可根据使用者的不同达到最佳的颈椎承受状态，可以起到预防，缓解及修复各种颈椎类疾病。

Functions: This pillow is designed according to the anatomy of the human body, the waveform shape fits the head and neck perfectly, It's suitable for all types of people use.

竹炭保健记忆枕 BAMBOO CHARCOAL MEMORY FOAM PILLOW

采用最新高温萃取技术，将竹碳粉和记忆绵完美融合，研发出祛湿、除异味、抗菌抑菌、保健等功能为一体的竹炭记忆枕。

Take the latest high temperature extraction technology, combined with carbon powder and memory foam. Develop the bamboo charcoal memory pillow with the function to remove odor, dampness, antibacterial, health care as a whole.

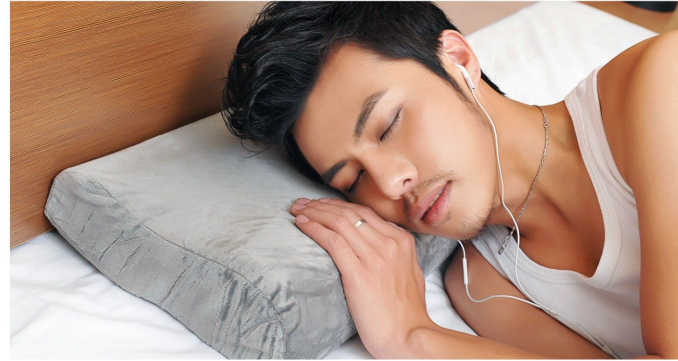

竹炭的功能

- 1、竹炭炭质细密,比重大,空隙多,矿物质含量丰富,纯天然制品,无毒、无味、无副作用。
- 2、炭质本身有着无数的孔隙,能有效的吸收空气中的各种浮游物质,对硫化物、甲醛、苯,等有害化学物质起到吸收、分解异味和消臭的作用。
- 3、竹炭能产生最适合人体吸收的远红外线波长,能使物体产生微热,促进人体衰老细胞的活化,加快血液循环,改造人体内的环境。从竹炭中释放的负离子具有穿透作用,能松弛神经,消除疲劳。

Advantage of bamboo charcoal

1. Bamboo charcoal is a kind of natural material with breathable, odor free and eco-friendly characters.
2. This material is various of cell hole, it can absorb organic substance in the air and then be helpful for getting rid of formaldehyde.
3. Moreover, It is also temperature sensitive and do good to speed blood circulation, and relax body, easy to make you feel refresh and comfortable.

铭捷3D羽绒枕介绍 SUPER COMFORT 3D PILLOW

3D羽绒棉是一种全新开发出来的3D全开孔网状结构材料,完美结合了羽绒柔软性和乳胶的弹性、韧性,具有弹性好、透气性强、长时间使用不变形等优点。

上世纪90年代欧美发达国家为了解决病人长期卧床带来褥疮等问题而开发。研究人员认为普通的床垫由于缺乏足够的透气性,使病人的过量热量和汗液无法及时散去,引发褥疮等问题,同时过高的表面硬度和过低的承托力又会造造成病人血管等过度压迫或腰椎间盘突出等。经过长期临床应用效果来看,超弹3D羽绒棉很好缓解了这些问题,但由于价格高昂和技术的垄断一直没有在我国大量使用。

经过多年的研发,我司成功了把该产品移植到枕头等日用品中,成功解决了困扰多年的颈椎压迫、散热等问题,为您提供舒适的金属睡眠!

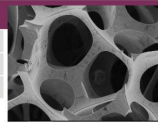

3D foam pillow is a new design product which is made from a new material called 3D open network structure foam. It combines the softness of feather and the resilience of latex, perfectly so that it is excellent at good rebound, good breathing as well as anti-distortion.

In the 90s of the 20C, 3D open network structure foam is designed to solve the issue about bedsores for bed-ridden.

Researchers think that the common and airtight mattress is one of main cause of bedsores as well as Slipped Disc. After

乳胶床垫是把从橡胶树上采集来的橡胶树汁，通过精湛的技术工艺结合现代化高科技设备和多种专利技术进行起模、发泡、凝胶、硫化、水洗、干燥、成型和包装等工艺来生产。乳胶制作成的乳胶床垫具有高弹性，可以满足不同体重人群的需要，其良好的支撑力能够适应睡眠者的各种睡姿。乳胶床垫接触人体面积比普通床垫接触人体面积高出很多，能平均分散人体重量的承压力，具有矫正不良睡姿功能，更有杀菌的功效。乳胶床垫的另一大特点是无噪音，无震动，有效提高睡眠质量，透气性较好！

Latex mattress is made from the juice of rubber tree and is produced by a series of advanced manufacturing process?like molding,foaming,curing,drying,shaping,packing etc.. Latex mattress has faster recovery character, which meets all needs of different people. The contact area of latex mattress is much higher than normal mattress, so that it is better at spreading your weight ,correcting your position and sterilizing.Latex mattress also has noiseless ,non-vibrational and breathable properties which can provide better sleep.

记忆枕保养常识

Maintenance of common sense

枕芯使用1-3个月后要放在阴凉通风处自然通风，且不可放在阳光下暴晒。使用过程中一定不要不要被水浇湿，虽然记忆绵是吸湿的，但是吸湿后是甩不干的，只能风干。枕芯使用过程中忌长时间重压，有些人在不用的时候用重物一直压着，因为长时间一直被重压和可能造成无法回弹的情况。

Pillow core should be placed in cool ventilated area when it uses 1-3 months, and not exposure in the sun. Don't wet by water, it can't dry out as memory foam is moisture absorption. Avoid long time heavy pressed in the process of the use, some people like to press it in heavy when it not use but it may cause the memory foam not rebound.
