INSTALLATION

The product can be used to all kinds of wood doors which the weight is below 25kgs. The door closer can be installed on the door or door frame. Normally, it can be installed under the first hinge of the door.

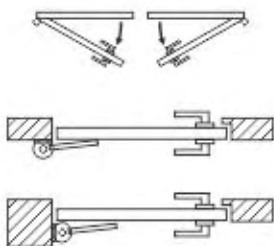

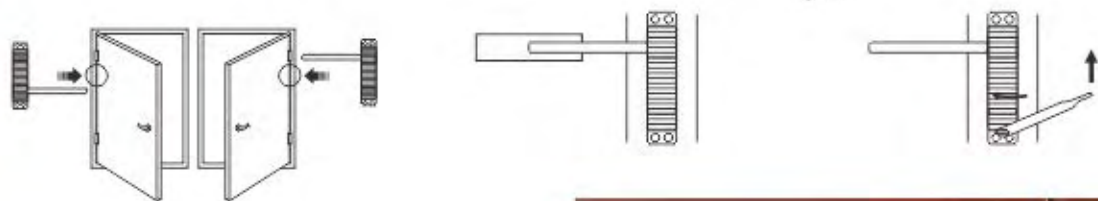

2. Choose suitable position and fix the product on the door or door frame.

4. Adjust the elasticity of the product according to the actual weight of the door and the speed that suit for closing the door. The method is the following: Insert the thinner side of tool bar to the underside of door closer trough, then turn towards to the door side. You will hear the click voice. Please don't turn it too tight. Normally 3-4 space is enough.

1. Open the package and take out the product, screw the rotundity slide to the door closer.

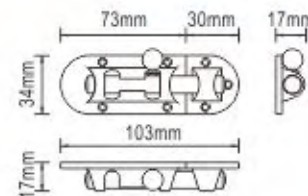

3. Stick the stainless steel bar to track of rotundity slide on the door, that can prevent the slide damage the door.

5. If turn it too tight, that need adjust it again. Please aim the crescent handle at the screw of other side of door closer. Unclench, then djust it again.
