SUPPORT

SUPPORT SERIES

• Q7 for infrared knitting series support uses the world's top specialized computerized knitting machines and retains the advantages of breathable knitted brace device, using ergonomic design, to solve the problem of insufficient pressure. It enhances the stability of sports support by partial impression (the skin area of sport support). Using for infrared anion cotton material (see attached authoritative test report), the partial pressure area emits the negative ions for infrared which can promote blood circulation, relieve fatigue and aching joints and accelerate injury recovery.

• Based on ergonomic principles and strict production process, Q7 pressure support series products choose the superior material and integrate the new knitting technology to produce the best product. The Q7 pressure support worn convenient and comfortable with safe material. With excellent fixed effecting, the overall distribution structure responsive without distortion. Q7, this active product produces its effect during movement. During movement the shaped viscoelastic ring compresses and massages the soft tissues. The resulting enhanced circulation in the joint capsule and promotion of lymph drainage. It leads to reduced swelling, pain relief and improve function while, at the same time, protecting the joint.
