

Sleeves

# Stand out from the rest

Is it the outside or the inside that sells? Both of course. We have long experience of producing sleeves for plants and herbs for the horticultural industry. What kind of sleeves are you looking for? We can print your sleeves in up to eight different colours and in different sizes, shapes, qualities and in large or small series. Make your sleeves your best marketing tool.

Oboya specializes in printing on plastic and in making labels, flower bags, flat bags, pot handles, handles for planting flats and other packaging solutions for the floral trade. Our own in-house printers have both the experience and the expertise to bring you the packaging that will make your products sell.

**Our standard templates or your very own**  
Choose the fastest route and use one of our standard templates or design your very own unique sleeves together with us. Make your products stand out from the crowd with our practical packaging solutions. Just give us a call and we'll find the solution that's right for you and your specific requirements.

Your own design based on your brand...

...or one of our many standard templates.

Ready to hang on in-store displays.

Plant and herb sleeves are a great way to showcase your products and protect them at the same time.

Printing in up to eight colours.

Paper touch gives a classic handmade feeling.

Choice of size, shape, decor and quantity.

## For fresher herbs and plants

In the Oboya laboratory we measure plants' different levels of respiration so we can help you choose the right perforation for your products. Our sleeves come with a choice of ventilation holes. We offer a variety of perforation options to give maximum respiration control.

Quick and easy – pop your plants in their sleeves with our ergonomic equipment.

## Make your brand stand out with your own distinctive designs

The right packaging will help you sell more plants, promote your brand, protect your product, allow both easy transport and attractive shop displays, as well as being easy to open and to recycle. Our packaging gives you all these advantages! Sleeves can be the perfect packaging for your products. Our plant and herb sleeves come in a variety of styles that all deliver strong presentation, provide convenience, and help protect your products. Let us help you find the right sleeves to showcase your flowering plants and herbs.

## Longer life with the right sleeves

Even plants need to breathe and with the right sleeve ventilation they will stay fresh during transport and on the shop shelf. Perforated sleeves give you the respiration control needed to maximise healthy growth for your plants.

But the right sleeve for a primula isn't the right sleeve for a hyacinth. Some plants need correctly placed ventilation holes to keep leaves fresh and healthy, while others will dry out with too many holes, and still others need none at all.

Talk to us and we will help you choose the right sleeves with either macro- or microperforation – and your plants and herbs will reach the customer fresh, attractive and healthy.

## Holes for different reasons

Not all holes are ventilation holes! You might want special holes for hanging your plants in displays. We can make your sleeves exactly according to what you and your plants need.

## Cut flowers need special care

Customers buy cut flowers fresh and healthy – but what happens once they have taken the flowers home? Give the customers the help and instructions they need to keep their cut flowers fresh by adding Oboya labels and your customers will soon come back to buy more.

Dressed and ready to go.

Ventilation holes – the right number, the right size and the right position.

Ready to hang on in-store displays.

Protect your herbs and plants during transport and on the shop shelf.

## Choose a template or design your own

Oboya plant and herb sleeves come in a variety of shapes and styles that all protect and promote your products. You can choose from one of our practical and easy to use templates. Our in-house design team are ready to help you create the perfect sleeve for your product designed just for your brand.

- ✓ V-seal
- ✓ Perforation (micro, macro, laser perforation)
- ✓ Hanging, air, water holes
- ✓ Sleeves with handles
- ✓ Sleeves with tapes
- ✓ Flexoprint up to eight colours

# Come closer

Our customers – that's everyone who likes the idea of talking directly to the manufacturer. With shorter lead times and no intermediaries we make things really simple and easy for you. We offer a wide range of products from packaging solutions to cultivation equipment. We research, develop, design, print and manufacture ourselves, giving us one hundred percent control of the entire process.

Welcome to a closer partner with the best service you can imagine. We are as close as your telephone.

Or even closer.

# Let the best solutions roll in

Fast transport and functional material handling are essential in the plant and flower industry. At Oboya we want to give you the best trolleys for effective logistics, cost savings and a good working environment. And with functional design to be proud of.

Every minute of the day plants and flowers are being moved on trolleys all over the world. The flower trolley business is a major industry and at Oboya we are always looking for the best logistics solutions for cost savings and optimal handling.

**Oboya Horticulture** is one of the biggest producers of logistic wagons in the world, with four factories located in China. We are constantly developing new products that will save costs and facilitate better handling both in transport and for the retailer.

With our newest product you can tip the shelves on 1/2 and 1/1 trolleys in one easy go, to give a better display in the retail shops and our newly developed special wheel with brakes can be used with our entire range of trolleys.

At Oboya Horticulture we have our own design department, so we can meet all our customers' special demands. Do you want personalized trolleys with your own choice of colours and your own logo? No problem, just let us know!

Our flower trolleys are always in stock in different locations around the world, and we can deliver anywhere on demand.

With state of the art machinery we can always give our customers the best price and shortest delivery time.

Oboya Horticulture provides 24 hour service, and is the best preferred partner in the flower trolleys logistics business.

## New patented lifting system

Increase your sales in shops with the new flower trolley lifting system. Display your flowers and herbs to their best advantage and make them easy for customers to reach. The Oboya, patented lifting system can tip trolley shelves for better positioning in only two seconds.
