PROFESSIONAL R&D TEAM OF KAIDI ELECTRICAL

TEAM

Since its inception, the company has relied on its main aspects, producing the most advanced technology in the world, introducing advanced foreign production facilities, and paying the most attention to personnel training and technological innovation. Hiring domestic senior and international experts for technical training has helped us improve and strengthen our R&D capabilities.

This has increased quality and efficiency, Kaidi has established a research and development team of professional electrical, mechanical, electronic, hardware/software, industrial design engineers that produce industry leading innovations.

QUALITY & SERVICE

Take each customer as a customer for life. Kindly and cheerfully set the industry standard for service and after-sales support, our desire for customer satisfaction is second to none.

Kaidi's steady development over the past 24 years has been due to our high product quality. Our products are exported to many countries including the USA, UK, Germany, France, Canada, South Korea, Japan, and many other countries.

Kaidi has also set up sales and support offices in Europe and North America to provide the professional and complete service to ensure that all of our customers can receive our professional technical and quality support.

Through strategic planning which combines both domestic and foreign market focus, Kaidi is building a world famous brand in this industry.
